Unless I missed some in-game options the game currently does not appear to support WASD movement nor binding mouse buttons even with the rebindable keys. I ended up using the numpad for most of the keybinds just to keep action buttons on the right side and movement on the left. It seems that most of the reviews stating 'fluid' or 'solid' controls are either used to arrow key movements or are more likely using a gamepad.

Gamepad or autohotkey required with this game for those that prefer a WASD setup.

No complaints beyond the controls. this game ♥♥♥♥tared 1st boss lvl. In my opinion, the most important DLC pack for Helldivers.

1. The Ranger armor is cool if you're into hoods and robes.

2. LHO-63 "Camper" is uhh... rather useless. Wait, let me explain
   - The damage is decent enough to the point that you can take down most enemies with 1 shot
   - It has a lackluster magazine capacity at 8 shots
   - Compared to the other ARs, the Camper is below average

3. The Bumblebee UAV is the strategem that any squad should have, it extends the detection range to almost the whole mission area so it will keep you on your toes for incoming patrols. When upgraded to Mk3, the Bumblebee will pinpoint Samples on the minimap so you can go collect dem science.. A cool beautiful casual hexagonical game, after a long day of battling and what not chill out with this game.. should come with larger dlc... i love you guys but you need to figure this whole dlc♥♥♥♥♥♥out. collected all 100 acheivements in under an hour,
*the whole game will take most people an hour to complete.
*yes, the pictures do have less clothing in them as the difficulty increases.
*no, there isn't a lot more exposed as the difficulty increases.
(they've decided to reuse the same images in all three difficulty levels but each level removes clothing while also giving the images a bit of an artistic feel.)

if you've only come here to see drawings of fully naked women, you're probably going to get bored quickly, the message from the devs just before the main menu comes up is quite clear. "this isn't that kind of game."

6.5/10, worth the price I paid.. Hitboxes on this are horrible making it unplayable.. the tutorials don't even work what a pos looks good plays awful. Damn.
Seriously, I just can't move my eyes off Zoe. Am I the only pervert here?

Nice Interface
Simple Functions
Fast Download and silence install r perfect
Program work for me perfectly for few years now.. This game is definitely one worth playing for VN lovers. Superb plot, fantastic music, cute artwork, interesting mini music game, you can find all the criteria that make a great VN in this game. I'd say it is one of the top 5 VN games among the 50+ of the same type I've played. Worth trying.

. If you're reading this, buy the game. No, don't think about it. Buy it now. Right now.
And if you don't own Predynastic Egypt, pick that one up too.

This game is a huge improvement over Predynastic Egypt. Waaay bigger maps (both city and world), an increased number of superb artwork, tons of history snippets, mastabas, temples and pyramids galore.
The combat is a bit more interactive. City buildings can be demolished and replaced with others for different resources. Diplomacy is better. Scouting is better. There are more gods to worship with various bonuses. The world map is highly interactive. Heck, everything is better.

As you play, the game gets more and more challenging. Trials are ramped up and offer more diversity. Expect to lose the game 2-3 times before you get the hang of it.

This game, just like Predynastic, is a must-play for anyone who enjoys ancient egyptian history.
10/10. I'll be playing this for a while and I hope that the studio will make a Middle Kingdom game too. And a New Kingdom one. And a late Period + Ptolemaic one. Because damn these games are awesome.. what the hell you guys hating on a free roshambo game... dafuq? kys. First time I asked for a refund. I was promised something new but it soon becomes the same old tedious bridge builder.
