About This Game

Have you ever faced your fears? Now you can in Final Rest. This is an experience that tests your fears, while you are undergoing surgery and you wake up in a nightmare. You will experience the story of the butcher, who used to roam the halls of the asylum, now turned hospital and experience what he has done to his victims first hand.

Final Rest

is a short non-interactive horror experience (approximately 4 minutes) that is intended to be given at a party using props. It allows a party host to scare the guest, while they are facing some of the many phobias people have like: rats, spiders, fierce dogs, hypodermic needles, blood, claustrophobia and even death itself. This experience was created with the idea of using props like a feather duster, can of compressed air, spray bottle of water and other items to give the guest an unexpected surprise while they are taken to their Final Rest.

To win prizes upload your videos of your victims being frightened on social media using hashtag #FinalRestVR or reply to the trailer on Youtube and we will be choosing the winners bi-weekly and promoting your video on our social media sites.

Haha... This game was crazy... and I loved it!

. There is everything, the search for objects, puzzles. The scene with the search for objects here is really a lot, and the passage of the puzzle that gets stuck in the search scene of the object. The scenes are not very complicated, but there are some difficult moments.. It's quite hard if u got the controll., if didn't get the controll, it will be brutally hard.

Fun and Engaging one.. Go for it... At first glance this game will look like some sort of Monkey Island ripoff. And in a way, that might be the way to describe it. Personally, I think it's more of a love letter to adventure games of yesteryear, combining the atmosphere and humor typical of major adventure games of the 90s with a few modern twists, including quests to find hidden pieces of eight and crackers, and a clever hint system should you choose to use it. If there's one thing that I dislike about many modern adventure games, it's that they give hints much too easily. Making the puzzles difficult to solve and not forcing hints down your throat is better for an adventuring experience.

The developer commentary is quite fun and at times hilarious to listen to, ranging from anecdotes on the game's development to outtakes from the voice artists. (Be on the lookout for Janes singing "Party In The USA!") The addition of unlockable character profiles and artwork does feel like an attempt to put in some artificial replay value, but that's really my only major complaint with the game.

Overall, if you want a short but sweet ride through a colorful world created as an homage to 90s adventures, I recommend giving this game a shot.. I get into the game but it freezes every time :/. Decided to give EXIT a try after watching a few videos and previews of the game. I enjoyed playing through the various levels this game offers. At first glance, it's a tiny bit pricey at \$8.99, but given the amount of content and the future updates that will include many more levels to play through, you'll be getting more than enough value for the price.

Music is solid. Controls are responsive, with only one ball being allowed to move at a time. You can use the keyboard or mouse to move the balls around.

Gameplay is simple to pick up on with easy levels at first to show you the basics. Simple objective to get all the balls into their matching color slots. All levels are pure logic, with no guessing needed. It's more learning the mechanics and obstacles in later levels and seeing how they play into solutions.

You can play in Casual, Normal, or Pro. Only difference is the tighter time limits as you go up on difficulty. So in Pro, you'll want to have solid routes planned already. Achievements are not that hard to get after a little practice. Once you beat a group of levels, you can practice the individual levels to learn new strategies, which can help in getting achievements and getting through Pro if you want to go that way.

Overall, a very solid puzzle game. Good amount of replay value if you're trying to improve chapter stats. With the future updates, this will get more value.. Like Runaway 1, it's not the best adventure game out there. However, I still liked it even more than the first. It's true that there are many annoying parts, such as not being able to skip animations, or having to repeat the same action many times. In this way, The Dream of the Turtle is perhaps worse than the first game. Despite these potentially major problems however, I think it's still possible to fully enjoy this game. The story and characters make you want to keep playing, even if you have to use a walkthrough for a significant percentage of the puzzles like I did. Besides, there is a lot of humor and

crazy situations to keep things interesting.

To get the best experience, I would play Runaway: A Road Adventure first. That way you'll be more invested in the world of Runaway, which will make it easier and more enjoyable. Overall a very good adventure game with many laughs and references that really got me pumped for Runaway 3 (which was truly amazing by the way).

This is actually, genuinely one of the best-designed games of last year. Really clever design, amazing soundtrack, top-notch visuals, well worth the price.. Purchased at \$2.50

Fun little time waster of a game, but it couldn't hold my attention enough to get through the campaign. It's too linear, and the star requirements to unlock later levels are too harsh. I got tired of replaying stages and failing to get better rankings, while learning no lessons to improve my skills, so now I'm stuck. Fun while it lasted.. This is more of a book and less of a game. . . No gameplay at all. Very disappointed.. This takes a unique style to a basic rhythm game. Most of the songs are good but the final song I kinda find lack luster. The final practice stage before the song sounds better than the actual song. Overall the enjoyment was worth the price but I would say the price is a little high for a rhythm game with 6 songs. Where in other rhythm games like osu that are free you have 7 songs and infinite community made songs.

note: world 4 best song and graphics are good on each level. Like many other HOG games published by Artifex mundi this game is more of the same, polished and consistent visuals, simple story and puzzles, decent ho scenes and pretty enjoyable gameplay. Game have pretty obvious Bioshock inspiration but not taking it to far, just a inspiration here and there :). Unfortunately the game only looks good if you happen to have stamp sized screen (800x600 looks ok). Tried running it 1920x1080, and results were horrible.

Menu desing was horrible, you could atleast give player a brief of what theyre doing there and some settings could be set up at fly (mouse speed)

Idea great, pricepoint should be twice lower if this is really going to be playable.

At the moment, it aint a full game. **It still has potential.**

. this is one of the worst games that i ever palyed. no story, bored, low amount of weapons and lineage. dont buy and dont play this ♥♥♥♥♥ game. and story 4 hours GG :D haha. Must have character
