bullet hell, or bullet ER rather. Very fun game, simple, efficient.

There are a lot of bugs when you play online, but I find it adds to the fun by bringing nice wtfesque elements.. Controls although simple feel annoying and unresponsive at times, especially when there is no way to pause or slow down the game and you have two or three fires to put out on the other side of the screen.

Progression is tied to a currency earned completing challenges, and while most of them are easy to obtain or figure out, others simply seem designed to show you how the game can cheap you out of a simple task and force you to reset the level and spend more time on it.

Wouldn't even think of getting it if it isn't on sale, too. You steer with the left stick. You accelerate with the left stick. You reverse with the left stick. It's a full driving experience with nothing but your left stick.. Easy to sum up in one word: garbage.. You can't win with pollution inducing buildings... I tried to build a ton of them and the money spikes up till everything naturally and their mother destroys everything I own.

So eventually I stick with all the clean hardwares and so much unnecessary time it took to finally get a million. I did other things to wait, I wasn't going to sit there. And that's about it, completely anti-climactic. I decided to get any fun out of this, I was just going to end it planting the most pollution inducing and just cover the world with unlivable dirt.

It also seems to bug me that the music is the same throughout which gets annoying, especially from alllll the painful waiting. I guess at some point I was hoping it would change to a dark setting when you pollute the land enough but no it stays the same... which sounds weird in a world that looks really dangerous to live in.

The fact that I had to wait and do other things in order to win is a poor excuse of a game. I was hoping this was sort of like Simcity but with some pollution mechanics to it. If there's a better game to just wait all day, I'd rather just go to the DMV. It's at least somewhat entertaining watching various people do things there.. go ahead, throw your money away, nobody ♥♥♥♥ing cares.

you will find no joy whatsoever in this game.. Its a pretty good app for rust id say its perfect if it didnt seem to struggle with reds and it needs to draw faster. But gotta say even with it not being perfect with every pictures colours i did get some good star wars and lincoln osiris photos in my base now.

8V10. This game is so cute, however I have keep having lag that makes this game unplayable. Once that is fixed then I would definitely recommend this game.. it nice game and i love how its a throw back to ze bomberman games as for what it has its good tho some things might want to be like when i was playing with three other friends there were times when the game woundlt let me start the match so i had to restart the lobby but when we did play it, it was as the descrption gave fun,choatic and this is only with 4 people i cant wait to try this with 8 and i hope the maps if add arent just repeats of the same map before hand all in all i really like this game

i can't even make it past tutorial. Turned it off straight away as the controls and keybindings are terrible even though i know it's an old classic game but neh not for me and loved commandos on the playstation 2.. Immersive Atmosphere

+Very Good Quality Sounds and Music

+Interesting Story

-Fairly Short (15-25)

Definitely try this game out if you can. I'm hoping the developers will make some sort of full game based around this some time.

(8.5/10). Worth it I could play this game for hours theres so many things to do!. This was awesome before they added VR support. It is even better when they surprised us with VR support.. Very fun party game. I love watching people try to ski.. This game was my childhood and it's still A++++++ close to 20 years later!. Gain you free time. click mouse and climb up from first floor of hospital to higher which you able.

Find the better way to play it then you'll love this game as same as me ^__^
